## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-11 and 13-20 are rejected under 35 U.S.C. 102(b) as being anticipated by White (4,344,151).

White's Fig. 1 illustrates a multiport memory including a first look-up table (e.g. ROM 25) that generates a first partial product signal from an address formed by concatenating a first and a second input signal (e.g.  $B_R$  and  $A_R$ ), a second look-up table (e.g. ROM 26) that generates a second partial product signal from an address formed by concatenating a third and a fourth input signal (e.g.  $B_R$  and  $A_I$ ) and a logic circuit (e.g. elements 31, 32 and 41).

Relative to applicants' remarks White shows concatenating two input signals to produce an address, note the above paragraph. Also relative to applicants' remarks the four inputs to the complex multiplier constitute the inputs to a quad port memory. Relative to applicants' remarks concerning claim 5 note the above paragraph. Relative to applicants' argument concerning claim 6 if data is represented as a single bit then there is no difference between a serial and a parallel configuration. Relative to applicants' remarks concerning claims 7 and 8 they are moot because the claim language is indefinite as detailed in the 112 rejection paragraph below.

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 12 is rejected under 35 U.S.C. 103(a) as being unpatentable over White and Chehrazi et al (Chehrazi).

It would have been obvious to a person of ordinary skill in the art at the time the invention was made to add one or more registers in increase the throughput of White's multiplier because pipelining is a well known technique to increase throughput as illustrated by Cheharizi.

***Claim Rejections - 35 USC § 112***

5. Claims 7-11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The concatenating of the first and fourth input signals for addressing the third look-up table is mis-descriptive, note Fig. 1. Similarly note claim 8. Claim 10 is mis-descriptive because the first partial product signal is not shifted, note the equation of page 8, line 3.

*Conclusion*

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
